eMIT -
Municipal
Income Tax

Overview

eMIT is a complete Web-based municipal income tax system designed to meet the needs of the modern municipal tax office. This comprehensive software package allows for the collection, filing, billing, and administration of all taxes due.

Features

eMIT is one of the first municipal tax applications that allows taxpayers to file and/or make payments online using the Web. It also provides for the tracking of application/city-specific information such as losses that are carried forward, business allocation percentages (partnerships), and audits.

The Integrated Pre/Post Judgement Collections feature allows you to track court information for taxpayers who are being litigated. While eMIT includes several form letters that can be sent to taxpayers, it also includes a feature that allows you to modify text to these form letters.

The Batch Input feature allows municipal tax offices to quickly enter multiple transactions that can then be filed together as a batch, allowing for faster processing and smaller storage of physical records. In addition, eMIT includes voucher notice generation for withholders.

Benefits

eMIT -- the next generation of municipal income tax software -- is an easy-to-use, intuitive software application that provides municipal tax offices with an efficient tool for processing Income Tax Returns. eMIT is a powerful, client/server solution that eliminates duplication of effort, improves efficiency, and reduces turnaround time in notifying taxpayers and in receiving money and information from taxpayers. In addition, it promotes solid accountability through local enforcement and administration.

Documentation

eMIT, like all SCI applications, is delivered with online help and a comprehensive set of documentation.

SCI

Software Corporation International (SCI) has always believed in the power of clients, people, and partnerships based on mutual respect. Since 1990, we have been providing high-quality, high-impact technical and management consulting services to the financial industry. From the beginning, our philosophy has been to provide our clients with the skills and knowledge of the most experienced and talented professionals in the marketplace and to exceed the expectations of our clients every day.

Today, while SCI remains focused on its initial market, the company has significantly increased its professional services and solutions offerings. SCI's eGovernment Solutions group was formed to leverage the company's knowledge and expertise to deliver a suite of niche based applications for local government agencies in the United States.

eMIT is an excellent example of SCI's focus in software development. The company's goal is to provide tools, utilities, and applications that deliver real value and provide immediate benefits.

For more information about eMIT or other SCI solutions and professional services, please contact our eGovernment Solutions group through our Web site at www.sci-solutions.com.
